Hiring Manager
Microsoft

Dear Hiring Manager,

I am writing to express my interest in the Site Reliability Engineer (SRE) Intern position at Microsoft. With a solid foundation in software development and system monitoring, along with hands-on experience as a Front-End Intern at Alfido Tech, I am excited about the opportunity to contribute to your team and support operational excellence at scale.

My academic background in Cybersecurity from MS Ramaiah Institute of Technology, combined with experience developing an automated system monitoring tool in Python, has prepared me well for this role. During my internship, I worked with cross-functional teams to develop responsive web interfaces, optimize performance, and ensure high-quality deliverables. This experience has honed my problem-solving skills, aligning well with the demands of the SRE role, where efficient troubleshooting is essential.

I am particularly drawn to this position for its focus on optimizing system performance and availability. My passion for automating processes and analyzing data fits perfectly with the responsibilities of improving service monitoring and reporting. With technical expertise in CSS, JavaScript, Node.js, and database management systems, as well as a Site Reliability Engineering Certification from Microsoft Learn, I am confident in my ability to support service deployments and configurations.

I am excited about the chance to contribute to Microsoft's mission of ensuring service reliability and performance. Thank you for considering my application. I look forward to discussing how my skills and enthusiasm can add value to your team.

Warm regards,

Akash Kolde
