Bengaluru, Karnataka, 560054, India

Motivated individual Eager to learn and contribute to site reliability, monitoring, automation, and cloud infrastructure management. Enthusiastic about optimizing system performance, availability, and scalability.

Work Experience

Front-End Intern
Alfido Tech | Remote

Present

Developed responsive web interfaces using React.js, integrated RESTful APIs, optimized performance, and collaborated with UX/UI teams. Debugged and resolved issues, ensuring high-quality deliverables while contributing to three client projects during the internship at Alfido Tech.

Projects

Automated System Monitor

May 2024 - Aug 2024

Designed an automated system monitoring tool in Python to track and analyze CPU and memory usage. Enhanced efficiency by implementing real-time alerts for resource spikes, minimizing manual oversight and improving system performance management.

Core Skills

CSS , Cybersecurity, database management , Debugging, express.js , Git , HTML, Javascript , MongoDB node, node.js, Powershell ,Python react.js, virtual machines, Windows, troubleshooting, operating systems, scripting languages, data collection, accountability

Education

MS Ramaiah Institute Of Technology

Sep 2023 - Present

Bachelor of Engineering CSE (Cyber Security)
GPA 7.7

Government Polytechnic College

Aug 2020 - May 2023

Diploma in Computer Science Engineering
GPA 9.36

Certificates

Site Reliability Engineering Certification
Microsoft Learn

Nov 2024
